

**PROPOSED AMENDMENT  
TO ARCHITECTURAL GUIDELINES**

Resolved, that paragraph Sixteen of the Architectural Guidelines is amended to delete the first three sentences and to substitute the following in their place:

Except as herein expressly provided, all houses must have natural wood siding or be all brick or a combination of brick, wood, stucco (including, without limitation, stucco-like material such as "Hardi Plank Siding") or some other acceptable combination. However, vinyl or aluminum siding will not be allowed in Gatling Pointe except that the Chapel Hill series vinyl siding by Wolverine Technologies will be allowed due to its similarity in appearance to other permitted exterior elements. Technology is rapidly enabling manufacturers to produce new types of products with aesthetically resemble traditional exterior surfaces but often have superior wearability or other qualities. Accordingly, the Architectural Review Board reserves the right to approve such new exterior elements for use in Gatling Pointe on a case by case basis. Except for homes utilizing approved Chapel Hill series vinyl siding, all homes must be stained or painted; natural wood surfaces will not be allowed.
